Skills

- XR/VR/AR Development (Unity, Unreal)
- OpenXR, SteamVR, Meta SDK
- C#, C++, JavaScript, Python
- Cross-Platform Build & Optimization
- Haptic & Assistive Tech Integration
- UI/UX, Interaction & Locomotion
- Database & Analytics Integration
- Agile, Scrum, Jira, Trello
- Hardware/Software Troubleshooting
- Technical Documentation

Shipped Projects

- Drivers of Tomorrow (KCM, Pierce Transit)
- MarsVR (Steam, Mars Society)
- Adventure Climb VR (Steam)
- Wheelchair Mobility Simulator
- Swedish Physical Rehab VR
- Europa VR

Awards

- IGDA Foundation Velocity Award
- Tesla Suit Certified
- USAF Achievement Medal
- USAF Good Conduct Medal
- Mars Society Outstanding Service

Career Summary

XR developer and technical lead with 5+ years shipping production Unity and Unreal applications across VR, AR, and mixed reality. Lead programmer on **50+ XR solutions**, including two Steam-published titles with MXTreality and The Mars Society. Strong integrator across OpenXR, Meta SDK, haptics, and assistive technologies—getting complex systems working on real hardware for real users. U.S. Air Force veteran (C-17 Electrical & Environmental Systems). Bellevue College XR Lab Coordinator.

Work Experience

Lead Extended Reality Developer

July 2021 – Present | MXTreality / Drivers of Tomorrow | Seattle, WA

- Lead developer for **Drivers of Tomorrow** (MXTreality transit training division): multi-device bus/CDL training platform—VR, mobile, web, and simulator hardware—overseen for **King County Metro** and **Pierce Transit**.
- Lead development and integration for **50+ XR applications** spanning transit training, education, medical/rehab, and entertainment—Unity and Unreal, OpenXR/SteamVR/Meta SDK, multi-device deployment.
- Shipped **Adventure Climb VR** on Steam (2019, updates/DLC); co-developed **MarsVR** with The Mars Society (Steam, 2022)—interaction systems, optimization, and release support.
- Own gameplay/systems work: interaction pipelines, locomotion, UI/UX, audio/VFX, database/analytics, optimization, and client hardware integrations (haptics, accessibility).
- Partner with artists, designers, and stakeholders; write operating instructions, support installs, and run live client demos.

XR Lab Coordinator & VR Application Developer

January 2020 – Present | Bellevue College XR Lab | Bellevue, WA

- Coordinate NSF-funded XR Lab operations (NWXR EDU Network): equipment lifecycle, software deployment, faculty/staff training, and equitable student access.
- Supervise student employees/interns; mentor App Development capstone teams on Unity VR builds—UI/UX, interactions, locomotion, Scrum, and delivery.
- Lead Unity workshops and support faculty/students building XR capstone applications.
- Led rapid-response VR classroom deployment during COVID—full capstone class in VR in under two weeks (first full VR class session at Bellevue College).

Aircraft Electrical & Environmental Systems Specialist (2A656)

October 2010 – January 2017 | U.S. Air Force | JB McGuire-Dix-Lakehurst, NJ

- Maintained electrical and environmental systems on **C-17 Globemaster III** aircraft (305 AMXS, AMC); fleet value **\$2.6B**.
- Performed inspections, troubleshooting, and repair on aircraft electrical, bleed air, and environmental subsystems using C-17 technical orders and test equipment.
- Previously held **Secret security clearance** (lapsed; reinstatement eligible). Honorably discharged; medical retirement. SrA (E-4).

Education

Bellevue College | Bellevue, WA

Bachelor of Applied Science – Information Systems – Application Development

January 2018 – June 2021

Community College of the Air Force – Air University

October 2010 – 2016

Military technical training — college credit earned; no degree awarded

Kudan Institute of Japanese Language | Tokyo, Japan

December 2007

Conversational Japanese | VR Club President, Bellevue College
